Deluxe Colour Change Kit

Lights flow through the colours of the rainbow, and the Colour Master Deluxe controls the speed or selects a specific colour according to your mood. Gradual colour changing for sophisticated mood lighting or fast colour for fun/party lighting effects. With sound to light technology the controller can be set to change colour in time with music beats/clapping, etc. - great for parties!

Alternatively the Controller can set constant colours or Ice White.

The Colour Master Deluxe is supplied with a kit of 10x30mm round IP66 LED fittings, in stainless steel housing, each with a 5m cable. A 12V internal transformer which may be used outdoors if enclosed with a IP66 rated (water and dust light) junction box. A Colour Master Deluxe Controller with 15mm cable and a remote control. The lights are connected in series, so that one light joins on with the next one. The maximum of 10 lights may be connected together. Each fitting contains 6 Super Bright LEDs. LED size: (HxDia) 26x30mm, (Cylinder Dia) 23mm
